

Multinomial Distribution MLE: Part 3[← Back](#)

Graded Assignment • 10 min

 **Due** May 14, 11:59 PM PDT**Your grade: 100%**Your latest: **100%** • Your highest: **100%**

To pass you need at least 80%. We keep your highest score.

Next item →**^ Overview**

Part 3 of this assignment allows you to check your work in the programming exercise, Part 2.

1. How many sides did the dice have, K ?**1 / 1 point**

20

 **Nice work**

Inspecting the table, there are $K = 20$ classes that x_k could be. This corresponds to the number of columns in the table.

2. How many rolls, N , were there?**1 / 1 point**

5000

 **Nice work**

Inspecting the table, there are $N = 5000$ rolls. This corresponds to the number of rows in the table.
